VALUE ADDED COURSE

Course outcome

The Value Added Course – **Plant tissue culture techniques** will help the students for learning new methods of conventional breeding techniques fulfill the required demand of crops. Tissue culture came around as a grand leap in breeding practices. It makes use of parts of a plant to generate multiple copies of the plant in a very short duration. This technique exploits the property of totipotency of plant cell which means that any cell from any part of the plant can be used to generate a whole new plant. After complete this course is more beneficial to create self-employment income generating to students for multiplication of many plants in their own nursery. This Plant tissue culture techniques course focuses on all round development of the students to face competitive world.

III. Reading Comprehension

Read the following passage and answer the question Nos. 1 to 5.

The Constitution guarantees every citizen the fundamental right to equality. Yet after 50 years of independence, just one perusal of the female infant mortality figures, the literacy rates and the employment opportunities for women is sufficient evidence that discrimination exists. Almost predictably, this gender bias is evident in our political system as well. In the 13th Lok Sabha, there were only 43 women MPs out of total of 543; it is not a surprising figure, for never has women's representation in Parliament been more than 10 per cent.

Historically, the manifestos of major political parties have always encouraged women's participation. It has been merely a charade. So, women's organizations, denied a place on merit, opted for the last resort; a reservation of seats for women in parliament and State Assemblies. Parties, which look at everything with a vote bank in mind, seemed to endorse this. Alas, this too was a mirage.

But there is another aspect also. At a time when caste is the trump card, some politicians want the bill to include further quotas for women from among minorities and backward castes. There is more to it. A survey shows that there is a general antipathy towards the bill.

It is actually a classic case of doublespeak: in public, politicians were endorsing women's reservation but in the backrooms of parliament, they were busy sabotaging it. The reasons are clear: Men just don't want to vacate their seats of power.

1. The problem raised in the passage reflects badly on our:

- (A) Political system.
- (B) Social behaviour.
- (C) Individual behaviour.
- (D) Behaviour of a group of people.

Answer: (B)

2. According to the passage, political parties have mostly in mind:

- (A) Economic prosperity.
- (B) Vote bank.
- (C) People's welfare.
- (D) patriotism.

Answer: (B)

3. "Trump Card" means:

- (A) Trying to move a dead horse.
- (B) Playing the card cautiously.
- (C) Sabotaging all the moves by others.
- (D) Making the final jolt for success.

Answer: (D)

4. The sentence "Men just don't want to vacate their seats of power" implies:

- (A) Lust for power.
- (B) Desire to serve the nation.
- (C) Conviction in one's own political abilities.
- (D) Political corruption.

Answer: (A)

5. What is the percentage of women in the Lok Sabha:

Course Outcome

Department of chemistry conducted Value Added Course in Food Adulteration for B.Sc –I Sem students for the academic year 2022-23. The duration of the certificate course is 30 hrs.Theory classes were conducted for 29 students.

Food adulteration has many ill effects on our health. Prolonged consumption of adulterated food may even prove to be lethal. The use of organic food is more trending these days, as organic foods give us the complete nutrition that a particular food is supposed to give. It is not laden with harmful chemicals or polished with toxins like wax. But, due to low productivity, organic food is not always available and is more expensive than the common produce. Therefore, it is important to detect if our food is adulterated. Various home methods can be used to do this. The course has created awareness on food adulteration to the students.

Read the short story given below and answer the following questions.

The Blind Girl

The star of this story is the blind girl. Unfortunately, this girl hated herself – purely based on the fact that she was blind. Her boyfriend, whom she loved dearly, was always there for her. She often said she would marry him if only she could see the world. One day, whether it be a miracle or the incredible power of science, she could finally see everything. The story states that this was only made possible through a kind donation. Her dream came true, and she could now see her boyfriend. He asked her to marry him, as that was her promise.

However, the girl was shocked to discover that her boyfriend was also blind. She refused to marry him and broke his heart. He walked away in tears. The girl later discovered that her boyfriend was the donor, and with the donation, he lost his sight. When our circumstances change, our mind changes too. Not only do you have to stay true to yourself and appreciate everything, but you never know what's happening behind closed doors.

- Who is the star of this story?
- Why the girl hated herself
- Who donated the eyes to the blind girl?
- Why did girl refuse to marry her boyfriend?
- What is the moral of story?
- Why did the girl shock?

IV. Listening Comprehension 4X1=4

Questions 16-20

Label the diagrams below.

Choose five answers from the box and write the letters A-J next to questions 16-20.

- A bracer
- B chest guard
- C drawstring
- D fibre glass
- E fletching
- F hand guard
- G quiver
- H shaft
- I sight
- J tension

Let's take a look at the equipment. The bows are fairly heavy – you might be surprised. We'll spend a moment practicing holding the bow properly before we load one up. I'm holding it now in the position in which you'll hold it. The drawstring is here and again you might be surprising at the tension. You'll need to practice drawing back the string. Just above the middle of the bow here is the 16 "sight". You look through this as you would with a rifle. Using a bow and arrow without a sight is perfectly possible – most master archers do this – but having one will certainly help you to start off with.

Now I'll put the bow down and show you an arrow. The 17 "shafts" of our arrows are wooden but fibre glass arrow shafts are now common too. Traditionally, as I'm sure you'll know, the 18 "fletching" at the top of the arrow – I mean not the tip end of the arrow – was made of feathers. We have some arrows with feather fletching but we also have some with what we call vanes. That means the fletching is made of solid plastic. All of you have a 19 "quiver" with six arrows in it. You should tie the strap of the quiver around your waist like this. As I've said, you take an arrow from your quiver when I say so – when it's your turn and not before. Oh, I nearly forgot – protection. Everyone has a chest guard and hand guard like those that I'm wearing – I'll show you how to put the chest guard on in a moment – and a 20 "bracer". The bracer's a smaller arm pad that protects the inside of your arm from the string. For those of you in a T-shirt today that's important but the bracer will also stop the string catching on the sleeve of a jumper or jacket. Right, so before we pick up the bows, let's have a look at these chest Guards.
