REPORT ON GUEST LECTURE

Department of Journalism and Mass Communication of our S.B Arts & K.C.P Science college has organized a Guest Lecture and press day on 01 July 2023 at 9:30 A.M. **Dr. Shrinivas.H. Doddamani Assistant professor Dept. Kannada** was a Resource Person he spoke on Topic **"Journalistic significance and literary contribution"**. He spoke Journalism, known as the fourth estate of democracy, requires practical knowledge not limited to marks to become a journalist. Many journalists who have achieved success in the field of journalism are examples for us. Assistant Professor of Kannada Department, Dr. Srinivasa Doddamani said that the contribution of Dr. P. G. Halakatti, the father of Vachan, to the field of journalism through the News papers "Nava Karnataka and Shivanubhava" is unique. 115 Students have been attended the of guest lecture with Staff Member.

Report of Endowment Lecture

The Department of M A English and Department of Kannada jointly in association with Zilla Sharana Sahitya Parishad and Zilla Kadalli Vedike organised an Endowment Lecture on 7-8-2023 in Seminar Hall No.01 at 10:30 am.

The Dignitaries honoring Lord Basaveshwar.

The Guest speaker with the thoughts

The Topic of this Endowment Lecture was "Dasimayya haghū Basavannannavar Vachanagallalli tatvikateya Chintanegallu". The Chief Guest Speaker, Dr. Sangmesh Metri very elaborately explained about the importance of the Vachanas which incidentally frame the Vachanasahitya. This provides a new perspective for the analysis to live meaningfully and with authority of the knowledge of our history. The vachanas of the Vachanakara Devara Dasimayya of 11th Century and Basavanna of 12th Century were taken for discussion. The thoughts conveyed by these Vachanakaras in specific and other vachanas in general was very beautifully examined and explained. The awareness for the social reforms was given through the Vachanas for the society. All these concepts were very excellently collaborated by the Guest Speaker. Shri Ashok Kanchyani, the President, Zilla Sharanara Sahitya Parishad, conveyed the explanation of this Endowment and further gave the information about the path trodden of its donors to us. Dr. R.M. Mirdhe, Principal, the President of this Lecture, very rightly expressed the need of the imbibing of the cultures and traditions of our country in our youth which is the urgent need of the hour. The Vachanasahitya written in the earlier Centuries still have their existence and emerge with its importance. She also called for our Students to rise, awake and communicate with our richness of the customs. The Entire Program was an Event worth diagnosed and organised for our Students. All the Students of M A, English and Kannada Departments were present. The Faculty of M A English, Kannada Departments and Faculty of various Departments of the College were also present.

DEPARTMENT OF BOTANY

GUEST LECTURE REPORT

Department of Botany was organized Guest lecture, topic on "Recent trends in Biomedical Science" for B.Sc VIth semester students on Wednesday 09/8/2023 at 11 a.m by **Dr. Renukaradhya K Math**, Associate Professor, SDM Research institute for biomedical Science, Dharwad. He has delivered elaborate lecture on the topic **Recent trends in Biomedical Science**. He has explaining Biomedical Science is in an amalgamation of biological Science and medical Science and this program is to gain advanced knowledge and skills in the field of Biomedical Science. During the session students are being exposed to the various molecular aspect of a cell and got to know how the genomic sequence of a pathogen helps in understanding the variety of protein produced in it and that in turn assist scientist to produce antibiotic to control the host from various diseases and how Research methodology lecture create a strong base for research and development for innovative ideas and translation of inventions to clinical medicine for the betterment of human health. This lecturer are aspire to students careers in academia, biomedical research in research centers/ institutes to work in the biotechnical, pharmaceutical and health care industry in Indian and abroad.

This guest lecture was very useful to B.Sc VIth semester students. Our department students enjoyed this lecture and they gained the knowledge about advanced branch of biology such as Bioinformatics etc. The students and staff members were actively involved in this guest lecture. At the end of the lecture there was interaction between the speaker and the students. 102 students and 6 teaching staff were present.

Sub: A Letter of Gratitude....

Respected sir,

We are extremely happy to express our heartfelt gratitude for having graced the programme by your presence and imparting your valuable knowledge & experience on '**Hindi Kahaniyon me Manaveey Samvedana**' held on 28th December 2023 organized by Department of Hindi.

All the participants are really enlightened by your thoughtful words. We the staff and behalf of participants are very much grateful to you for spending your valuable time and best of knowledge.

We solicit your moral support and co-operation in future too...

With Regards,

Principal,
S.B. Arts and KCP Science College

Report on 'Hindi Kahaniyon me Manaveey Samvedana'

In the field of Hindi stories, writers of many generations have highlighted the changing economic, social, political and cultural situations. Due to modernization, technology and the cruelties imposed by the capitalist system, human sensitivity has been declining. There was a change in social relationships. Personal aspirations, wishes and desires were violated. The breaking of personal aspirations, desires and the desire to acquire wealth have deprived man of his humanity and created a situation of dehumanization. He said that we should adopt new real values through morality. 64 Students were present in this occasion and also department faculties Dr. G.M. Gend and Dr. Sumi Chopade were present.

To,
The Principal,
S.B.Arts and K.C.P Science College
Vijayapura.

Respected Madam,

Sub: Regarding permission to organize Guest Lecture on
"Group Theory".

The Department of Mathematics has planned to organize a Guest Lecture on "Group Theory" for B.Sc II semester students of Academic Year 2022-23 . We would like to invite Tanzeela Jagirdar, Assistant Professor Department of Mathematics from Anjuman Arts, Science and Commerce Degree College Vijayapura. On 20/07/2023 at 3pm for the Guest Lecture.

Thank you

H. O. D.

REPORT

Topic: IR and Raman Spectroscopy

Infrared spectroscopy (IR spectroscopy or vibrational spectroscopy) is the measurement of the interaction of infrared radiation with matter by absorption, emission, or reflection. It is used to study and identify chemical substances or functional groups in solid, liquid, or gaseous forms. It can be used to characterize new materials or identify and verify known and unknown samples. The method or technique of infrared spectroscopy is conducted with an instrument called an **infrared spectrometer** (or spectrophotometer) which produces an **infrared spectrum**. An IR spectrum can be visualized in a graph of infrared light absorbance (or transmittance) on the vertical axis vs. frequency, wavenumber or wavelength on the horizontal axis. Typical units of wavenumber used in IR spectra are reciprocal centimeters, with the symbol cm^{-1} .

Raman Spectroscopy is a non-destructive chemical analysis technique which provides detailed information about chemical structure, phase and polymorphy, crystallinity and molecular interactions. It is based upon the interaction of light with the chemical bonds within a material. Raman is a light scattering technique, whereby a molecule scatters incident light from a high intensity laser light source. Most of the scattered light is at the same wavelength (or color) as the laser source and does not provide useful information – this is called Rayleigh Scatter. However a small amount of light (typically 0.0000001%) is scattered at different wavelengths (or colors), which depend on the chemical structure of the analyte – this is called Raman Scatter.

REPORT

UV and Microwave Spectroscopy

- ✓ Many molecules absorb ultraviolet or visible light.
- ✓ The absorbance of a solution increases as attenuation of the beam increases.
- ✓ Absorbance is directly proportional to the path length, b , and the concentration, c , of the absorbing species.
- ✓ *Beer's Law* states that $A = ebc$, where e is a constant of proportionality, called the *absorbtivity*.
- ✓ Different molecules absorb radiation of different wavelengths.
- ✓ An absorption spectrum will show a number of absorption bands corresponding to structural groups within the molecule.
- ✓ For example, the absorption that is observed in the UV region for the carbonyl group in acetone is of the same wavelength as the absorption from the carbonyl group in diethyl ketone.
- ✓ The absorption of UV or visible radiation corresponds to the excitation of outer electrons.
- ✓ Transitions involving SIGMA, PI, and n electrons.

REPORT

Inorganic Chemistry- Metal Complex and acid base chemistry

An acid is any hydrogen-containing substance that is capable of donating a proton (hydrogen ion) to another substance. A base is a molecule or ion able to accept a hydrogen ion from an acid. Acidic substances are usually identified by their sour taste. An acid is basically a molecule which can donate an H^+ ion and can remain energetically favourable after a loss of H^+ . *Acids are known to turn blue litmus red.* Bases, on the other hand, are characterized by a bitter taste and a slippery texture. A base that can be dissolved in water is referred to as an alkali. When these substances chemically react with acids, they yield salts. *Bases are known to turn red litmus blue.*

Metal complexes consist of a central metal atom or ion surrounded by several atoms, ions or molecules, called *ligands*. Ligands are ions or molecules that can have an independent existence, and are attached to the central metal atom or ion. Examples of ligands are halide ions, carbon monoxide, ammonia, cyanide ion, etc. In describing complexes, the ligands directly attached to the metal (usually as Lewis bases, donating electrons to the metal), are counted to determine the coordination number of the complex. Ions that are directly coordinated to the metal are written within the brackets of the formula, and are referred to as *inner sphere*. Ions that are serving as counter ions in order to produce a neutral salt, and are not coordinated to the metal are called *outer sphere*, are written outside of the brackets in the formula.

M.SC(CS) Programme**

**A Report on
Role of Computer Science in Biotechnology**

The guest lecture was organized by BLDEA's S B Arts and K C P Science College, Vijayapur M.Sc.(CS) Programme . The topic was "Role of Computer Science in Biotechnology" on 4th September 2023 at 11.30am in M.Sc.(CS) Lab. The resource person was Dr. Prachi Parvatikar, Dept. of Biotechnology, Science & Technology, B.L.D.E. (Deemed to be University) Vijayapur.

The guest lecture was commenced with the fundamental of Role of Computer Science in Biotechnology Dr. Prachi had explained in detail about the how Computer science is relevant to the field of biotechnology in many ways, especially in the area of bioinformatics – the aspect that involves the development of software tools and methods for understanding biological data, The science of bioinformatics actually develops algorithms and biological software of computer to analyse and record the data related to biology for example the data of genes, proteins, drug ingredients and metabolic pathways. Computational biology, a branch of biology involving the application of computers and computer science to the understanding and modelling of the structures and processes of life.

Discussed Topics:

- .. What is Biotechnology? How it is being using in medical sector?
- .. Application that we use in biotechnology.
- .. Demonstrated big data problems in bioinformatics.

Session was followed by all the fundamental topics about Biotechnology and session was wind up at 1.00 pm. Total 18 students were benefited from this session.

REPORT

The Department of Chemistry initiated a GUEST LECTURE on topic "After B.Sc Graduation a Career Guidance" by Dr. A.V. Raghu on 26/07/2023.

Dr. A.V. Raghu sir shared his ideas and personal experience on "After B.Sc Graduation a Career Guidance". Sir has explained and suggested about the career, Bachelor of Science is one of the mainly popular degrees in India as it opens doors to a variety of career opportunities. Several times students reflect the question 'What to do after B.Sc.?' or 'What career to choose after B.Sc.?' The main advantage is that B.Sc. graduates have a range of choices available for advanced education in terms of theme and topics.

And after the completion of B.Sc degree, there are numerous subjects and specializations to choose from. Students who have earned their B.Sc degree can pursue a variety of career paths or work options. These include teaching, technical writing, and research analysis. However, to advance in your career, an M.Sc degree is usually recommended. Candidates can gain an advantage over their competition by pursuing more specialized B.Sc courses. This makes them highly employable after obtaining their B.Sc degree. Aside from the lucrative jobs available after B. Sc. a student can also pursue a career in research and development. Thereby, the scope of B.Sc, post-completion, is excellent. After gaining a holistic understanding of concepts, students have wide career options after B. Sc. Here are various options that one can pursue after completing their B.Sc: Post graduation, fellowship, internship, research in particular subject, Science and creativity, science and agriculture also high paying jobs after degree of B.Sc.

I Thank to Dr. A.V. Raghu sir for their valuable suggestion regarding after B.Sc graduation and also very satisfactorily explained how to build the career in design, analyse and explore data received from controlled experiments to arrive at logical solutions that may have practical applications. They create and conduct studies, analyse results and share findings with others in the scientific community. They also carry out fieldwork as part of research and try to develop new techniques and practices.

**DEPARTMENT OF COMPUTER SCIENCE
INVITATION LETTER FOR GUEST LECTURE**

To,

Prof. GIRISH KULKARNI HOD

Department of MCA
BLDEA's V.P.Dr.P.G.Halakatti
College of Engineering & Technology, Vijayapur.

On behalf of B.L.D.E. Association's S.B. Arts and K.C.P. Science College, Vijayapur, the Department of BSc Computer Science is going to organize a Guest Lecture on "**Advanced features of Web Technology**". I am very pleased to have an honor of inviting you to deliver lecture at our College as part of the academic Guest Lecture Program.

We have arranged the lecture on **10th August, 2023 at 11:00 am to 12:00pm.**

We are expecting attendees of approximately 42 Students and faculties.

Sir please let us know if you will require any audio – visual equipment or additional technological support. Also, please keep us informed of your arrival.

Best Wishes

Head of the Department,

Guest Lecture - Advanced Features of Web Technology

The department of Computer Science has organised the Guest Lecture on 10th August, 2023 for BSc VI semester students. The resource person - **Prof. GIRISH KULKARNI, Coordinator of dept. of MCA, BLDEA's V.P.Dr.P.G.Halakatti College of Engineering & Technology, Vijayapur** has delivered a lecture on the topic "Advanced Features of Web Technology". He has published number of papers in National and International Journals. He has delivered lectures in various organizations and Universities. He also chaired technical session in National and International Conferences. The Guest Lecture has conducted in Lecture Room No. 12, at 11.00 am. Totally 40 students participated in this Guest Lecture.

The speaker explained about how the Advanced Web Technology is widely used in the era of web development. It is also used to simplify data storage and data sharing. He explained the advanced features like AJAX, JavaFX and Microsoft Silverlight and advantages of Web Technology.

The recent works on Web Technology projects handled by their team were discussed and finally research directions in the area of Web technologies are shared with the participants. After his lecture the students were given time to interact with him. Students felt that the session was more informative and interactive. At the end of the guest lecture, two students gave their feedback, and explained how they were benefited.

Subject : Letter of Appreciation

Respected Sir,

Thank you very much for delivering an informative and thought provoking lecture as a guest speaker on "**Advanced Features of Web Technology**" held on 10th August 2023 at the Department of Computer Science for BSc VI Semester students.

All the students appreciated and got benefited from your views on the subject.

Looking forward for your cooperation for the promotion of professional education in further as well.

Thanking You

GUEST LECTURE REPORT

A Guest Lecture was conducted by the Department of Physics and Electronics on the topic entitled "Polymer Nano Composites" by **Dr. Anand S. Kulkarni**, Assistant Professor & Head of the Physics Department, Government First College, Vijayapur held on **19/10/2022** at 3:00 pm in Seminar Hall No-1. Dr. Anil B. Naik, senior faculty of Physics department welcomed the Guest Speaker on to the Dias, introduced him to the audience and requested him to deliver the guest lecture. Guest speaker has published number of papers in National and International Journals. He has delivered lectures in various organizations and Universities.

Guest speaker delivered a lecture on Polymer Nano Composites. Speaker covered all basics of polymers, methods of preparations of Polymer Nano Composites and applications of Polymer Nano Composites. After his lecture the students were given time to interact with him. Students felt that the session was more informative and interactive. At the end of the guest lecture, two students gave their feedback. Total of around 119 students and staff are participated during the lecture. The session ended with a vote of thanks from Dr. Pradeep Chavan, Assistant Professor of Physics Department. Some of the photographs while delivering the lecture are as follows:

DEPARTMENT OF PHYSICS & ELECTRONICS

GUEST LECTURE REPORT

A Guest Lecture was conducted by the Department of Physics and Electronics on the topic entitled "Electronic Materials" by **Dr. A. N. Chattarki**, Principal, Anjuman Arts, Science & Commerce College, Vijayapur held on **26/06/2023** at 3:00 pm in Seminar Hall No-1. Dr. Anil B. Naik, senior faculty of Physics department welcomed the Guest Speaker on to the Dias, introduced him to the audience and requested him to deliver the guest lecture. Guest speaker has published number of papers in National and International Journals. He has delivered lectures in various organizations and Universities.

Guest speaker provided a strong intuition and insight of the dynamic of electronic components like diodes, BJTS and MOSFETS which can be used to design and optimize circuits performance. He also explains the detailes of DC and AC analysis of BJT and MOSFETs especially for small signal analysis. According to the syllabus he covered each and every important point which will help the students to gain theoretical as well as practical knowledge. After his lecture the students were given time to interact with him. Students felt that the session was more informative and interactive. At the end of the guest lecture, two students gave their feedback. Total of around 162 students and staff are participated during the lecture. The session ended with a vote of thanks from Dr. Vani Desai, Assistant Professor of Physics Department. Some of the photographs while delivering the lecture are as follows:

SPECIAL GUEST LECTURE REPORT

GUEST SPEAKER Mr. MALLIKARJUN GONI

Research Associate, Research institute for Biomedical Sciences,

Shri Dharmasthala Manjunatheshwara University, Dharwad

Topic: Recent Trends in Biomedical Sciences

DATE: 09/08/2023 TIME: 11:30AM VENUE: SEMINAR HALL-1

Advancements in Gene Editing Technology:

One of the most significant trends in biomedical sciences is the rapid advancements in gene editing technology. Techniques such as CRISPR-Cas9 have revolutionized the field by allowing scientists to easily and precisely modify genes. This has opened up new possibilities for studying and potentially treating genetic disorders.

Emergence of Personalized Medicine:

Another major trend is the emergence of personalized medicine. With advancements in genomics and molecular diagnostics, healthcare is shifting towards a more individualized approach. By analyzing an individual's genetic makeup, doctors can tailor treatment plans specifically to their unique needs. This has the potential to improve outcomes and reduce adverse reactions to medications.

Focus on Microbiome Research:

The study of the human microbiome has gained significant attention in recent years. The microbiome, which consists of trillions of microorganisms residing in and on our bodies, plays a crucial role in maintaining overall health. Researchers are exploring its link to various diseases and investigating potential therapeutic strategies targeting the microbiome. Understanding the interactions between the microbiome and human health has the potential to lead to innovative treatments and preventive measures.

Advancements in Regenerative Medicine:

Regenerative medicine, which involves replacing or regenerating human cells, tissues, or organs to restore normal function, has seen remarkable advancements. Stem cell research, tissue engineering, and 3D printing technologies are being used to develop innovative therapies for a wide range of conditions, including organ failure and tissue damage. These breakthroughs have the potential to greatly improve quality of life and provide new treatment options for patients.

In summary, recent trends in biomedical sciences encompass advancements in gene editing technology, the emergence of personalized medicine, focus on microbiome research, and advancements in regenerative medicine. These trends hold immense potential to revolutionize healthcare and lead to significant improvements in diagnosing, treating, and preventing diseases.

SPECIAL GUEST LECTURE REPORT

GUEST SPEAKER Mr. MALLIKARJUN GONI

**Research Associate, Research institute for Biomedical Sciences,
Shri Dharmasthala Manjunatheshwara University, Dharwad**

Topic: Recent Trends in Biomedical Sciences

DATE: 09/08/2023 TIME:11:30AM VENUE: SEMINAR HALL-1

Advancements in Gene Editing Technology:

One of the most significant trends in biomedical sciences is the rapid advancements in gene editing technology. Techniques such as CRISPR-Cas9 have revolutionized the field by allowing scientists to easily and precisely modify genes. This has opened up new possibilities for studying and potentially treating genetic disorders.

Emergence of Personalized Medicine:

Another major trend is the emergence of personalized medicine. With advancements in genomics and molecular diagnostics, healthcare is shifting towards a more individualized approach. By analyzing an individual's genetic makeup, doctors can tailor treatment plans specifically to their unique needs. This has the potential to improve outcomes and reduce adverse reactions to medications.

Focus on Microbiome Research:

The study of the human microbiome has gained significant attention in recent years. The microbiome, which consists of trillions of microorganisms residing in and on our bodies, plays a crucial role in maintaining overall health. Researchers are exploring its link to various diseases and investigating potential therapeutic strategies targeting the microbiome. Understanding the interactions between the microbiome and human health has the potential to lead to innovative treatments and preventive measures.

Advancements in Regenerative Medicine:

Regenerative medicine, which involves replacing or regenerating human cells, tissues, or organs to restore normal function, has seen remarkable advancements. Stem cell research, tissue engineering, and 3D printing technologies are being used to develop innovative therapies for a wide range of conditions, including organ failure and tissue damage. These breakthroughs have the potential to greatly improve quality of life and provide new treatment options for patients.

In summary, recent trends in biomedical sciences encompass advancements in gene editing technology, the emergence of personalized medicine, focus on microbiome research, and advancements in regenerative medicine. These trends hold immense potential to revolutionize healthcare and lead to significant improvements in diagnosing, treating, and preventing diseases.

LETTER OF APPRECIATION

We place on record our appreciation for being resource person for Guest Lecture organized by our institution. **Mr. Mallikarjun Goni**, Research Associate, Research institute for Biomedical Sciences, Shri Dharmasthala Manjunatheshwara University, Dharwad, delivered Guest Lecture on Topic– “**Recent Trends in Biomedical Sciences- Application of Stem Cell Culture**” organised by Department of Zoology on 09/08/2023. We appreciate his valuable service in sensitizing students to new sector of science and research.

Dr. M. V. Patil
