REPORT

The Department of Chemistry initiated a GUEST LECTURE on topic "After B.Sc Graduation a Career Guidance" by Dr. A.V. Raghu on 26/07/2023.

Dr. A.V. Raghu sir shared his ideas and personal experience on "After B.Sc Graduation a Career Guidance". Sir has explained and suggested about the career, Bachelor of Science is one of the mainly popular degrees in India as it opens doors to a variety of career opportunities. Several times students reflect the question 'What to do after B.Sc.?' or 'What career to choose after B.Sc.?' The main advantage is that B.Sc. graduates have a range of choices available for advanced education in terms of theme and topics.

And after the completion of B.Sc degree, there are numerous subjects and specializations to choose from. Students who have earned their B.Sc degree can pursue a variety of career paths or work options. These include teaching, technical writing, and research analysis. However, to advance in your career, an M.Sc degree is usually recommended. Candidates can gain an advantage over their competition by pursuing more specialized B.Sc courses. This makes them highly employable after obtaining their B.Sc degree. Aside from the lucrative jobs available after B. Sc. a student can also pursue a career in research and development. Thereby, the scope of B.Sc, post-completion, is excellent. After gaining a holistic understanding of concepts, students have wide career options after B. Sc. Here are various options that one can pursue after completing their B.Sc: Post graduation, fellowship, internship, research in particular subject, Science and creativity, science and agriculture also high paying jobs after degree of B.Sc.

I Thank to Dr. A.V. Raghu sir for their valuable suggestion regarding after B.Sc graduation and also very satisfactorily explained how to build the career in design, analyse and explore data received from controlled experiments to arrive at logical solutions that may have practical applications. They create and conduct studies, analyse results and share findings with others in the scientific community. They also carry out fieldwork as part of research and try to develop new techniques and practices.
