6X1=6

Read the short story given below and answer the following questions.

The Blind Girl

The star of this story is the blind girl. Unfortunately, this girl hated herself – purely based on the fact that she was blind. Her boyfriend, whom she loved dearly, was always there for her. She often said she would marry him if only she could see the world. One day, whether it be a miracle or the incredible power of science, she could finally see everything. The story states that this was only made possible through a kind donation. Her dream came true, and she could now see her boyfriend. He asked her to marry him, as that was her promise.

However, the girl was shocked to discover that her boyfriend was also blind. She refused to marry him and broke his heart. He walked away in tears. The girl later discovered that her boyfriend was the donor, and with the donation, he lost his sight. When our circumstances change, our mind changes too. Not only do you have to stay true to yourself and appreciate everything, but you never know what's happening behind closed doors.

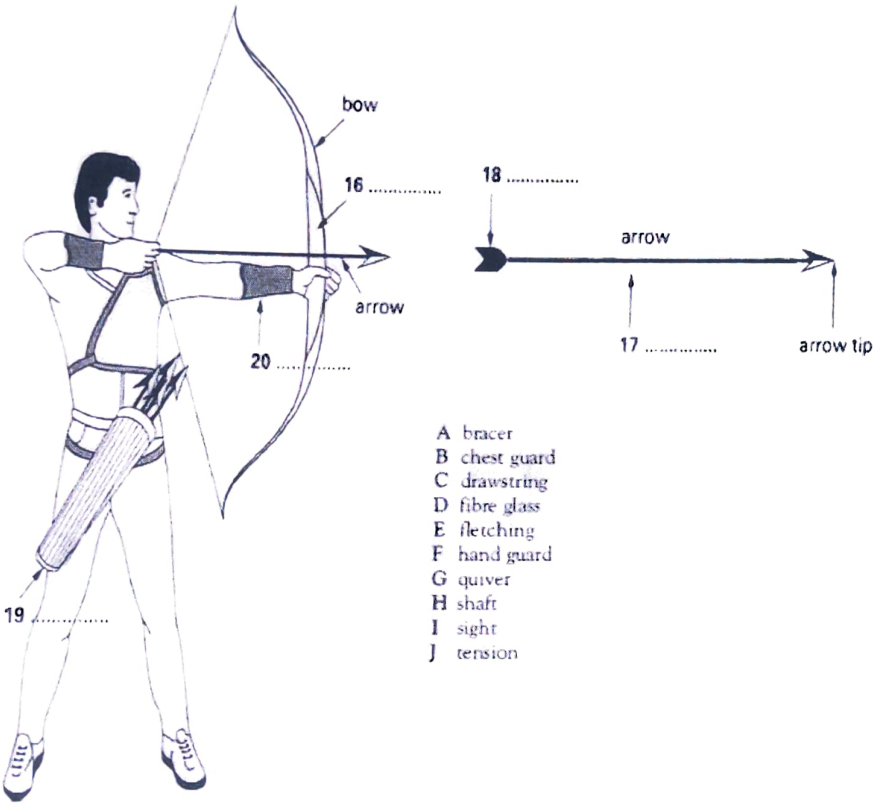

1. Who is the star of this story?
2. Why the girl hated herself
3. Who donated the eyes to the blind girl?
4. Why did girl refuse to marry her boyfriend?
5. What is the moral of story?
6. Why did the girl shock?

IV. Listening Comprehension 4X1=4

Questions 16-20

Label the diagrams below.

Choose five answers from the box and write the letters A-J next to questions 16-20.

Let's take a look at the equipment. The bows are fairly heavy – you might be surprised. We'll spend a moment practicing holding the bow properly before we load one up. I'm holding it now in the position in which you'll hold it. The drawstring is here and again you might be surprising at the tension. You'll need to practice drawing back the string. Just above the middle of the bow here is the 16 "sight". You look through this as you would with a rifle. Using a bow and arrow without a sight is perfectly possible – most master archers do this – but having one will certainly help you to start off with.

Now I'll put the bow down and show you an arrow. The 17 "shafts" of our arrows are wooden but fibre glass arrow shafts are now common too. Traditionally, as I'm sure you'll know, the 18 "fletching" at the top of the arrow – I mean not the tip end of the arrow – was made of feathers. We have some arrows with feather fletching but we also have some with what we call vanes. That means the fletching is made of solid plastic. All of you have a 19 "quiver" with six arrows in it. You should tie the strap of the quiver around your waist like this. As I've said, you take an arrow from your quiver when I say so – when it's your turn and not before. Oh, I nearly forgot – protection. Everyone has a chest guard and hand guard like those that I'm wearing – I'll show you how to put the chest guard on in a moment – and a 20 "bracer". The bracer's a smaller arm pad that protects the inside of your arm from the string. For those of you in a T-shirt today that's important but the bracer will also stop the string catching on the sleeve of a jumper or jacket. Right, so before we pick up the bows, let's have a look at these chest Guards.
