Report on TED Talk

“Can Artificial Intelligence be creative?”

The department has organized Ted-Talk on the topic “Can Artificial Intelligence be creative?” by Ahaan Pandya on 24th June, 2023 for the students.

This talk has organized for BSc II, IV & VI Sem. Students. The students were benefited with this talk. Their response was very positive. In this talk Ahaan Pandya told BCI technology allows a human brain and an external device to talk to one another to exchange signals. It gives humans the ability to directly control machines, without the physical constraints of the body.

Humans controlling machines with their minds may sound like something from a sci-fi movie, but it's becoming a reality through brain-computer interfaces. Understanding this emerging technology now can help ensure that effective policies are in place before BCI becomes a part of everyday life. Totally 72 students have participated in this TED Talk.
